

user story for patient and Receptionist

Value/Benefit	User Story	User Role	ID
Enhances the patient experience, reduces unplanned waiting times, and improves overall service satisfaction.	As a patient, I want to search for available appointment slots based on the scan type (e.g., MRI, CT), while viewing equipment availability, so that I can select a time that fits perfectly into my personal schedule.	Patient	US01
Ensures patient safety, prevents medical incidents from inappropriate scans, and reduces cognitive load on staff regarding complex medical decisions.	As a receptionist, I want the system to automatically verify "Patient Eligibility" upon inputting medical data and history, by cross-referencing scan types with vital factors (e.g., pregnancy, allergies, age).	Receptionist	US02
Increases patient health awareness and ensures safety, while saving time and resources for both the patient and the clinic if the procedure is unsuitable.	As a patient, I want to receive an immediate alert if my medical history (such as chronic allergies or specific conditions) conflicts with the requested scan type, so that I	Patient	US03

	can consult my physician before confirming the booking.		
Increases the clinic's efficiency in managing emergency cases and ensures that life-threatening or critical procedures are not delayed.	As a receptionist, I want a system that categorizes booking requests based on "Priority Level" and medical urgency, allowing them to be routed to available radiologists as quickly as possible.	Receptionist	US04
